DATA & AI AUTOMATION | ANALYTICS | BIOSTATS

EDUCATION

Emory University	Master of Public Health in Biostatistics	Atlanta, GA, USA | 2024
University of California, Santa Barbara,	B.S. in Statistics and Data Science	Santa Barbara, CA, USA | 2022

PERSONAL SUMMARY

Data and analytics professional with an M.P.H. in Biostatistics from Emory University and experience in pharmaceutical data, RWE, and clinical research. Skilled at turning complex requirements into reproducible data workflows and working software. Independently built and operate PinPet, a full-stack pet nutrition platform; seeking remote roles in data analytics, AI automation, analytics engineering, or data products.

PERSONAL PRODUCT

PinPet Aug 2026 - Present

Independent Product Developer

- Delivered a pet nutrition platform from concept to production independently, covering domain research, product definition, UX, architecture, full-stack development, testing, deployment, and operations.
- Translated AAFCO, FEDIAF, and NRC references, nutrient thresholds, ingredient constraints, and life-stage requirements into structured rules; built a deterministic LP/MILP engine for traceable, reproducible calculations.
- Applied an AI-assisted engineering workflow across requirements, design, implementation, code review, testing, debugging, and documentation; built the Python/FastAPI backend and React/TypeScript frontend.

PROFESSIONAL EXPERIENCE

Sinohealth Feb 2026 - Aug 2026

Senior Data Analyst | Beijing, China

- Managed standardized monthly delivery of nationwide pharmaceutical commercial datasets and independently handled feedback and custom data requirements for six leading pharmaceutical clients, including Bayer, Gilead Sciences, and Innovent Biologics.
- Applied machine-learning and interpolation methods to repair incomplete commercial and real-world datasets, then converted recurring cleaning and quality-control procedures into reusable AI-assisted workflows.
- Led development of a two-layer quality-control system combining LLM workflows with deterministic code-based rules; automated approximately 80% of manual review work and reduced the recurring delivery cycle from five days to two.

IQVIA Oct 2024 - Feb 2026

Biostatistician | Beijing, China

- Served as the independent statistician for a Bayer heart-failure study; prepared the Statistical Analysis Plan, programmed propensity score matching in SAS, generated tables, listings, and figures, and delivered reports.
- Used SQL, regular expressions, mapping logic, and systematic quality control for an observational prostate-cancer study, supporting patient characterization and downstream analytical decisions; also developed and reviewed patient funnel code for a real-world early breast-cancer study.

Atlanta Medical Center May 2024 - Oct 2024

Biostatistician | Atlanta, GA, USA

- Cleaned and analyzed more than 12,000 electronic medical records with Python/Pandas for two chronic-disease real-world studies; produced descriptive statistics supporting study planning and reporting.
- Converted clinical questions into research requirements and analytical tasks, supporting two investigator-initiated studies; reviewed and reproduced Statistical Analysis Plans and outputs and validated clinical study reports.

TECHNICAL SKILLS

Programming and Data: Python, Pandas, NumPy, Scikit-learn, TensorFlow, SQL, R, SAS, Stata

AI and Engineering: LLM-assisted workflows, prompt engineering, reusable AI workflow modules, automated quality control, FastAPI, React, TypeScript, automated testing, LP/MILP optimization

Analytics and Standards: Power BI, Tableau, ArcGIS, CDISC, SDTM, ADaM, SAP development, PSM, TLF generation and validation

Certification and English: ICH-GCP | TOEFL 108 | GRE 334
